

# ELOMATIC

INTELLIGENT ENGINEERING

At Your Service

# Elomatic in brief

© Jari Pekkarinen/Elomaito

## WHO WE ARE

We are engineering and consulting professionals and other experts that thrive on technical and business challenges. We derive satisfaction from providing solutions that give our customers a competitive edge.

## WHAT WE DO

Technical consulting, engineering, project management, product and service development, turnkey deliveries, products and solutions, software development.

## OUR MISSION

Our mission is to give our customers a competitive edge and make them more successful. We exceed their expectations. With optimized and sustainable products and services we improve living standards.

## KNOW-HOW LEADERS

We develop top know-how and aim to be forerunners in whatever we do. This is the lifeblood of our organisation and the core of our value proposition.

# Our customers

## LARGE AND SMALL

Our customers include both big multinationals and smaller companies. Their needs vary from once-off technical assistance and consulting up to complete turnkey deliveries of entire investments and products.

## DIVERSE INDUSTRIAL AREAS

Our customers work in a wide range of industrial areas. We have developed special expertise in biotech and pharmaceuticals, energy, machinery and equipment manufacturing, marine, offshore, process industries (food, chemical, pulp & paper, biomass processing) and starch and potato processing.

## AMBITIOUS

Our customers are ambitious. They are already very successful or want to become that. Our role is to ensure that their ambitions are achieved and sustained.

## PARTNERSHIP-ORIENTED

Our customers truly value long-term partnerships. They understand that such relationships are vital in creating true and lasting product and service value.

*Our job is to give our customers a sustainable competitive edge.*

*– Patrik Rautaheimo, CEO*

# Our services & products

## ONE-STOP SERVICE

Our goal is to provide our clients with all the technical engineering, consulting and project management needs they require under one roof. We understand the intrinsic value of being able to procure services centrally from a single reliable and trusted partner.

## ENGINEERING DISCIPLINES

We cover all engineering and design discipline needs: Plant, process, production, mechanical, ship, structural, automation, electrical, HVAC, instrumentation, IT, aerospace and lightweight structures, material efficiency, architectural and building construction...

## ADDED VALUE

In addition to traditional engineering and consulting we add value with a wide range of supporting services: e.g. virtual prototyping, CE marking, health, safety and environment services, information management tools, innovation services, laser scanning, technical analysis, user experience and visualisation.

## PRODUCTS & CONCEPTS

In niche know-how areas we have developed products and turnkey concepts: Cadmatic software solutions for engineering networks, Caligo flue gas scrubbers, oil well production systems, sterile liquid plants, and wheat starch processing technologies.

# Our offices

We operate globally and have clients in over 80 countries. Our offices are located in Finland, China, India, Italy, Kazakhstan, the Netherlands, Poland, Russia, Spain and the UAE.
